This screenshot shows a web-based content management interface for a car-related website. The top navigation bar includes a user icon, a title 'Car | Default', and a URL 'localhost:3000/studio/structure/car'. Below the header is a search bar with placeholder text 'Say something here' and a magnifying glass icon. On the left, a sidebar lists 'Content' categories: Author, Category, Post, Product, and Car, with 'Car' currently selected and highlighted in blue. The main content area is titled 'Car' and contains a search bar labeled 'Search list'. A list of car models is displayed with small thumbnail images: MG ZX Exclusive, All New Terlos, CR-V, Rolls-Royce, Nissan Altima, Chevrolet Camaro, and Porsche 911. At the bottom of the screen is a Windows taskbar with various pinned icons and system status information.

This screenshot shows a web-based application interface, likely a car management or rental system. The top navigation bar includes a user icon, a title 'All New Terlos | Default', and a URL 'localhost:3000/studio/structure/car;wsljz10ICZachwUMK3TgQi'. The header features the 'MORENT' logo, a search bar with placeholder 'Say something here', and various icons for notifications, settings, and account management. The left sidebar, titled 'Content', lists several car models: MG ZX Exclusive, All New Terlos (which is highlighted with a blue background), CR-V, Rolls-Royce, Nissan Altima, Chevrolet Camaro, and Porsche 911. Below the sidebar is a search bar labeled 'Type here to search'. The main content area is titled 'All New Terlos' and contains fields for 'Car Name' (set to 'All New Terlos') and 'Brand' (with a placeholder 'Brand of the car (e.g., Nissan, Tesla, etc.)'). The bottom right corner displays the system date and time ('3:28 AM 1/19/2025'), temperature ('26°C'), and battery status ('2').

The screenshot shows a web-based application for managing vehicle structures. On the left, a sidebar lists various car models: MG ZX Exclusive, All New Terlos (which is highlighted with a blue bar), CR-V, Rolls-Royce, Nissan Altima, Chevrolet Camaro, and Porsche 911. The main content area displays the details for the 'All New Terlos' model. It includes a 'Tags' section with a note about categorization, a 'recommended' tag, and a 'Car Image' showing a blue SUV from a side-front angle. The top navigation bar includes tabs for 'Structure', 'Vision', and 'Schedules'. The top right features a search bar with placeholder text 'Say something here', and icons for heart, notification, settings, and profile. The bottom right corner of the screen shows the Windows taskbar with various pinned icons and system status information.

A screenshot of a mobile phone displaying a laptop screen. The laptop screen shows a VS Code interface with a dark theme. The Explorer sidebar on the left lists project files including `src`, `app`, `payment`, `studio`, `test`, `page.tsx`, `favicon.ico`, `globals.css`, `layout.tsx`, `page.tsx`, `components`, `folder`, `lib`, `sanity`, `lib`, `ts client.ts`, `ts fetch.ts`, `ts images.ts`, `ts live.ts`, `ts queries.ts`, `schemaTypes`, `ts author.ts`, `ts blockContent.ts`, `ts cars.ts`, `ts category.ts`, `ts code.ts`, `ts index.ts` (which is selected), `ts post.ts`, `ts products.ts`, and `ts env.ts`. The terminal tab at the bottom shows the command `GET / 200 in 576ms`.

```
src > sanity > schemaTypes > ts index.ts > ...
1 import { type SchemaTypeDefinition } from "sanity";
2 import author from "./author";
3 import category from "./category";
4 import post from "./post";
5 import blockContent from "./blockContent";
6 import code from "./code";
7 import product from "./product";
8 import car from "./cars";
9
10 export const schema: {types: SchemaTypeDefinition[]} = {
11   types: [author, category, post, blockContent, code, product, car],
12 }
```

A screenshot of a dark-themed code editor, likely VS Code, showing a file named `next.config.mjs`. The file contains the following code:

```
1  /** @type {import('next').NextConfig} */
2  const nextConfig = {
3    images: {
4      // domains: ['cdn.sanity.io'],
5      remotePatterns: [
6        {
7          hostname: "cdn.sanity.io",
8          protocol: "https"
9        }
10      ]
11    }
12  };
13
14 export default nextConfig;
15
```

The code defines a `nextConfig` object with an `images` property containing a `remotePatterns` array. The array has one item, which is an object with `hostname` set to `"cdn.sanity.io"` and `protocol` set to `"https"`.

The file is part of a project structure under the `HACKATHONS` folder, specifically in the `src/sanity/lib` directory. Other files visible in the sidebar include `env.local`, `fetchts.ts`, `queries.ts`, `page.tsx`, and `page.ts`.
